I agree completely.  
Thanks

Adam, Rich will be coming in tomorrow. I would suggest he assist you as a technical specialist and as an Ops Chief with me. Since we do not have dedicated OSCs in Operations, I would like me and Rich to split the duty and get integrated so we have complete oversight of the USCG and operations in the field. We will need to modify the current Org Chart. I would also suggest a deputy PSC to assist the RP PSC. I would also suggest that we request three other field OSCs(Region 7?) to place in Divisions to provide oversight. We can talk about that tomorrow. Lets look at the org chart tomorrow and tweak it so that we have more EPA personnel in specific positions that the information flow is good and oversight is adequate.
